INTRODUCING OUR CAMPER VAN  
FULLY AUTONOMOUS RENEWABLE ENERGY  
CAMPER VAN

The E-VOLUTION camper is available  
only as a **CUSTOM ORDER** directly  
from the manufacturer in Saint-Jérôme.

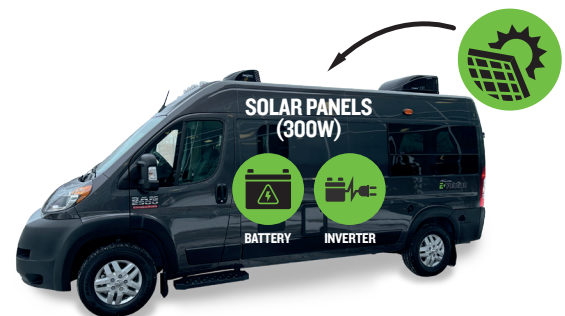

### The freedom to live as if you're at home.

That is what our E-VOLUTION model has to offer. Leave any time you want and change the decor to suit your mood, as if you were at home. The E-VOLUTION camper van is equipped with everything you'll need and more: a 12-volt refrigerator, an induction cooktop, a microwave oven, a crank awning, a forced-air gas heater, air conditioning, a TV with an antenna and USB port.

### All the autonomy and self-sufficiency you're looking for.

The E-VOLUTION camper van is fully electric and uses renewable energy with its three 100-watt solar panels, its 3,000-watt inverter and its powerful 300-amp lithium battery. It will allow you to run all your household appliances. Its 15-gallon fresh water tank, 15-gallon wastewater tank and cassette toilet will provide you with all the independence you could want.

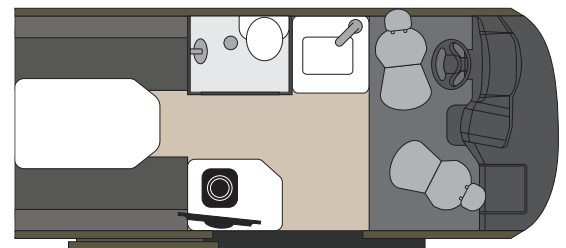

### Elegant simplicity that allows you to live differently.

Don't let unnecessary items clutter your space when heading off the beaten path: an elegant fibreglass interior with real maple cabinets, an eating area that transforms into a 60" x 73" queen-sized bed, all with an interior height of 6' 3", allowing you to easily walk around your house on wheels.

### Worry-free vacationing in unmatched comfort.

This ProLite E-VOLUTION camper is built on a ProMaster 2500 van with a 3.6 L gasoline engine and a 9-speed automatic gearbox, a two-inch trailer hitch and a towing capacity of 6,800 lbs, not to mention its 3-year/60,000 km (bumper to bumper) and 5-year/100,000 km full powertrain warranty, directly from Dodge, the manufacturer.

THE E-VOLUTION CAMPER IS AVAILABLE ONLY AS A CUSTOM ORDER DIRECTLY FROM THE MANUFACTURER IN SAINT-JÉRÔME.
